CONCEPTS AND DEFINITIONS

Before completing the Visitation Record, please ensure that you are completely familiar with the following concepts and definitions.

Building

The building is the most important unit of enumeration since each building, that is an independent physical structure, must be accounted for on the Enumeration district Map and recorded in the Visitation Record. It is the major means of checking progress in the field and the coverage of the Census.

A building is defined as a physical structure which is separate and independent of any other structure. It must be covered by a roof and enclosed within external walls. A building may be a factory, shop, detached dwelling, apartment building, warehouse, repair shop, poultry pen etc. NOTE that detached rooms relating to main buildings are treated as part of the main buildings, for example detached kitchens, toilets, servants quarters, garages, etc.

Closed Building

A closed building is one which, at the time of enumeration, is in use but with all the tenants temporarily absent i.e. absent for less than six months (the neighbours can usually help with identifying a closed building). You must check on the day after Census day to see whether it is still in use and closed.

Vacant Building

A vacant building is one which at the time of enumeration is not being used for any purpose. Also to be included in this category are buildings which are closed for six (6) months or more. However, you still have to revisit it on the day after Census Day to determine whether it was still vacant on Census Night.

A Dwelling Unit

A dwelling unit is any building or separate and independent part of a building in which a person or group of persons is living at the time of the Census enumeration. It must have direct access from the street or common landing, staircase, passage or gallery where occupants can enter or leave without passing through anybody else's living quarters.

Private Dwelling

A private dwelling is one in which a private household resides. This may be a single house, flat, apartment, outroom, part of a commercial building, or a boarding house catering for less than six persons.

Closed Dwelling Unit

A closed dwelling unit is one which is occupied, but during the enumeration period, the occupants are temporarily away, that is away for less than six (6) months.

A dwelling unit may be closed because the residents are away either on holiday or for some other reason. In such a case you may find out from the neighbour, the number of persons who live there and their surnames, if possible. You must also check on the day after Census Day to see whether it is still closed.

Vacant Dwelling Unit

If a dwelling unit is habitable but no one is living there at the time of your enumeration, you must also visit on the day after Census day so that you can interview anyone who may have moved in since your previous visit.

Private Household

A private household consists of one or more persons living together (i.e. sleeping most nights of a week) and sharing at least one daily meal. It is important to note that a member of a household need not be a relative of the main family. For example, a boarder or a domestic servant who sleeps in most nights of the week is a member of the household. It is possible for a household to consist of just one person, or of more than one family, as long as they share living arrangements. A group of unrelated persons living together can also comprise a household.
